Direct Donations

Direct donations represent companies' intentional decisions to fund Planned Parenthood. These donations are not a result of employee giving or matched charitable giving (indirect donations), instead being direct corporate giving. These donations constitute a massive portion of Planned Parenthood's funding.

The following list is compiled from 3 sources. These sources are 2ndVote, which maintains one of the most in depth and detailed lists of companies and their financial giving, eVALUEator, a faith-based investing group, and Partners for Ethical Care, a secular group promoting ethical child healthcare.

Companies present in multiple lists are only displayed in the first list.

Other Financial Support of Abortion

Many companies that don't directly fund Planned Parenthood support abortion in other ways. One good example of this is **paying for employees to get abortions, either the procedures themselves or the travel costs.** The list below comes from [CBS News](#):
